

Bookmarking with Firefox 🌐 (a Mozilla app)

After searching the Internet and finding a website you like and want to use frequently, a shortcut to returning to that website is to create a bookmark. **Bookmarks** are links you save to web pages that make it easy to get back to your favorite places. Follow these steps to create this shortcut when your browser is Chrome.

Add a bookmark

1. On your phone or tablet, open the Firefox app 🌐.
2. Go to a site you want to visit again in the future.
3. To the right of the address bar, click the Star ★.
4. The star will turn blue when the page is bookmarked and a window will pop up, so you can name, move, or tag your bookmark.

Open a bookmark

1. On your phone or tablet, open the Firefox app 🌐.
2. Tap the menu button in the upper right corner (looks like this). The image shows a horizontal menu bar with three icons: a checkmark, a bookmark icon (a square with a white outline and a blue fill), and a three-dot menu icon. The bookmark icon is circled in red.
3. Scroll to find the bookmark that you saved. Click on it to open the bookmarked page

Editing a bookmark

1. Tap the same menu button noted in 2 above.
2. Tap Bookmarks to find the bookmark that you saved.
3. Tap the three-dot menu next to the bookmark.
4. Tap Edit. You can change to an abbreviated name or just the icon for the site.

Deleting a bookmark

Important: After you delete a bookmark, you can't get it back without going back to the original website and bookmarking again.

1. Tap the menu button.
2. Tap Bookmarks and find the bookmark that you want to remove.
3. Tap the 3-dot menu next to the bookmark you want to remove.
4. Tap Delete.
